Revealing the biology of elusive deep living pelagic invertebrates

On Thursday 20 November 2025 (13:00-14:00 CEST), EMB will host its 54th Third Thursday Science Webinar featuring Henk-Jan Hoving (GEOMAR) who will present on the topic of "Revealing the biology of elusive deep living pelagic invertebrates". This webinar links to EMB Future Science Brief No. 12 'Deep sea research and management needs'.

Henk-Jan Hoving is a marine biologist who is passionate about deep-sea ecology, ocean exploration, marine technology and the deep pelagic, the largest habitat on the planet. He leads the Deep-Sea Biology working group at GEOMAR.
